We recommend you examine the daily statistics for distance and elevation gain, with an emphasis on elevation gain, to determine whether or not the difficulty level of this itinerary is suitable for your fitness and experience level.

Day	Date	Description	Segment	Comments	HD**	Distance		Est Time*	Elevation Gain		Elevation Loss	
						km.	mi.		m.	ft.	m.	ft.

*Estimated Time

Estimated time is based on the German Alpine Club's (DAV) pace measurement of 4.2 km. per hour and 400 m. elevation gain per hour. This measurement is designed for hikers who regularly hike in the Alps. If you are not used to hiking in this type of terrain, you can expect your time to be slower. Time for stops is not included. Actual time will vary.

**HD Hiking Difficulty

**HD is the technical difficulty rating for the segment, using the Hiking Difficulty scale introduced by the Swiss Alpine Club (SAC). The difficulty rating refers to the most technical spot on the segment, even if it is only a few meters long, and not necessarily to the entire segment.
